# CONTENTS OF VOLUME 66D

Volume 66D—No. 1—January–February 1962

	Page
A survey of the very wide band and frequency independent antennas—1945 to the present. John D. Dyson.....	1
Numerical investigation of the equivalent impedance of a wire grid parallel to the interface between two media. Tove Larsen.....	7
Current on and input impedance of a cylindrical antenna. Yung Ming Chen and Joseph B. Keller.....	15
Radar corner reflectors for linear or circular polarization. G. Latmirel and A. Sposito.....	23
On the theory of wave propagation through a concentrically stratified troposphere with a smooth profile. Part II. Expansions of the rigorous solution. H. Bremmer.....	31
On the propagation of VLF and ELF radio waves when the ionosphere is not sharply bounded. James R. Wait.....	53
Fields of electric dipoles in sea water—the earth-atmosphere-ionosphere problem. Wallace L. Anderson.....	63
Reflection of electromagnetic waves from thin ionized gaseous layers. F. H. Northover.....	73
Reflection and transmission of radio waves at a continuously stratified plasma with arbitrary magnetic induction. J. Ralph Johler and John D. Harper, Jr.....	81
On the diffraction of spherical radio waves by a finitely conducting spherical earth. Lillie C. Walters and J. Ralph Johler.....	101
An approximate full wave solution for low frequency electromagnetic waves in an unbounded magneto-ionic medium. William C. Hoffman.....	107
VHF radio propagation data for the Cedar Rapids–Sterling, Anchorage–Barrow, and Fargo–Churchill test paths, April 1951 through June 1958. George R. Sugar and Kenneth W. Sullivan.....	113

Volume 66D—No. 2—March–April 1962

Atmospheric phenomena, energetic electrons, and the geomagnetic field. J. R. Winckler.....	127
The summer intensity variations of [OI] 6300 Å in the tropics. D. Barbier, F. E. Roach, and W. R. Steiger.....	145
Generation of radio noise in the vicinity of the earth. P. A. Sturrock.....	153
Fading characteristics observed on a high-frequency auroral radio path. J. W. Koch and H. E. Petrie.....	159
Some problems connected with Rayleigh distributions. M. M. Siddiqui.....	167
Impedance of a monopole antenna with a radial-wire ground system on an imperfectly conducting half space, part I. S. W. Maley and R. J. King.....	175
Theory of the infinite cylindrical antenna including the feedpoint singularity in antenna current. R. H. Duncan.....	181
The <i>E</i> -field and <i>H</i> -field losses around antennas with a radial ground wire system. Tove Larsen.....	189
The electric field at the ground plane near a disk-loaded monopole. Jesper Hansen and Tove Larsen.....	205

	Page
A theory of radar reflections from a rough moon. Donald F. Winter.....	215
A lunar theory reasserted. K. M. Siegel and T. B. A. Senior.....	227
Statistical distribution of the amplitude and phase of a multiply scattered field. Petr Beckmann.....	231
Amplitude distribution for radio signals reflected by meteor trails, II. Albert D. Wheelon.....	241
High resolution pulse measurements of meteor-burst propagation at 41 Mc/s over a 1,295-km path. Robert J. Carpenter and Gerard R. Ochs.....	249
Ionospheric irregularities and long-distance radio propagation. H. A. Whale.....	265
On the role of the process of reflection in radio wave propagation. F. du Castel, P. Misme, A. Spizzichino, and J. Vogé.....	273
Correlation between hourly median scattered signals and simple refractivity parameters. Arnett S. Dennis.....	285
Observations of radio wave phase characteristics on a high-frequency auroral path. J. W. Koch and W. M. Beery.....	291
Diurnal and seasonal changes in structure of the midlatitude quiet ionosphere. J. W. Wright.....	297
Schumann resonances of the earth-ionosphere cavity—extremely low frequency reception at Kingston, R.I. C. Polk and F. Fitchen.....	313
Propagation of plane electromagnetic waves past a shoreline. J. Bazer and S. N. Karp.....	319
Currents induced on the surface of a conducting circular cylinder by a slot. Gerard Hasserjian and A. Ishimaru.....	335

Propagation problems with space radio communications. Karl Rawer....	375
On the absolute intensity of incoherent scatter echoes from the ionosphere. K. L. Bowles, G. R. Ochs, and J. L. Green.....	395
On the forward scattering of radio waves in the lower ionosphere. Tor Hagfors.....	409
Representation of diurnal and geographic variations of ionospheric data by numerical methods. William B. Jones and Roger M. Gallet.....	419
Interaction between an obliquely incident plane electromagnetic wave and an electron beam in the presence of a static magnetic field of arbitrary strength. K. H. B. Wilhelmsson.....	439
An analysis of VLF mode propagation for a variable ionospheric height. James R. Wait.....	453
A method for the determination of lower ionosphere properties by means of field measurements on sferics. Frank B. Harris, Jr., and R. L. Tanner....	463
Defocusing of radio rays by the troposphere. Robert E. Wilkerson.....	479
Magnetotelluric fields in the frequency range 0.03 to 7 cycles per kilosecond: Part I. Power spectra. C. W. Horton and A. A. J. Hoffman.....	487
Magnetotelluric fields in the frequency range 0.03 to 7 cycles per kilosecond: Part II. Geophysical interpretation. C. W. Horton and A. A. J. Hoffman.....	495
Impedance of a circular loop in an infinite conducting medium. Martin B. Kraichman.....	499

	Page
Theory of magnetotelluric fields. James R. Wait.....	509
Propagation characteristics of magneto-ionic plasma columns. D. Formato and A. Gilardini.....	543
Dielectric loading of electric dipole antennas. Janis Galejs.....	557
Possible influence of the ionosphere on the impedance of a ground-based antenna. James R. Wait.....	563
Some statistical theory for the analysis of radio propagation data. M. M. Siddiqui.....	571
Auroral sporadic-E ionization. Robert D. Hunsucker and Leif Owren.....	581
Comparative study of the correlation of seasonal and diurnal cycles of transhorizon radio transmission loss and surface refractivity. B. R. Bean, L. Fehlhauer, and J. Grosskopf.....	593
Enhancement of the lunar tide in the noon critical frequency of the $F_2$ layer over the magnetic equator. R. G. Rastogi.....	601
Scattering from a conducting sphere embedded in a semi-infinite dissipative medium. Janis Galejs.....	607
High-frequency scattering from a coated sphere. V. H. Weston and R. Hemenger.....	613
Propagation of spherical waves through an ionosphere containing anisotropic irregularities. K. C. Yeh.....	621

RF impedance probe measurements of ionospheric electron densities. J. A. Kane, J. E. Jackson, and H. A. Whale.....	641
Methods for applying numerical maps of ionospheric characteristics. William B. Jones and Roger M. Gallet.....	649
Very-low-frequency radio propagation in the ionosphere. Daniel W. Swift..	663
Prolonged space-wave fadeouts in tropospheric propagation. Albrecht P. Barsis and Mary Ellen Johnson.....	681
Range-error compensation for a troposphere with exponentially varying refractivity. J. J. Freeman.....	695
On the geometrical optics of curved surfaces with periodic impedance properties. Chester J. Marcinkowski and Leopold B. Felsen.....	699
On the limitations of geometrical optics solutions for curved surfaces with variable impedance properties. Chester J. Marcinkowski and Leopold B. Felsen.....	707
Conversion of the amplitude-probability distribution function for atmospheric radio noise from one bandwidth to another. A. D. Spaulding, C. J. Roubique, and W. Q. Crichlow.....	713
Some statistical properties of pulsed oblique HF ionospheric transmissions. Martin Balser and William B. Smith.....	721
Induction in a small loop moving with a magnetostatic dipole toward a conducting half space. Martin B. Kraichman.....	731
Propagation of terrestrial radio waves of long wavelength—theory of zonal harmonics with improved summation techniques. J. R. Johler and L. A. Berry.....	737
Terminal-zone corrections for a dipole driven by a two-wire line. Keigo Iizuka and Ronald W. P. King.....	775
Pattern synthesis with a flush-mounted leaky-wave antenna on a conducting circular cylinder. Akira Ishimaru and Frederick R. Beich.....	783
